Without parentheses, most words will use the first ending but there are some (even many) words that **always** use the later ending(s).

3rd declension adjectives come in 3 types which only affect the nominative/vocative singular: 3-termination (where each gender has its own separate form: e.g. āc·er −ris −re), 2-termination (where ♂ and ♀ are identical but neuter has a distinct form: e.g. trīst·is −e) and 1-termination where all genders have the same form (e.g. fēlīx −īcis). 1-termination adjectives can be mistaken for 3rd conjugation nouns, but note the absence of any gender in the principal parts.
